

## Keep Your Air Clean & Your Customers Happy

The CleanLeaf Smoke Series was specifically engineered for vape shops and smoking lounges looking for the safest, most effective and efficient solution for capturing thick smoke and other particulate. The 2000 CFM blower, pulls air through a 4" pleated pre-filter, MERV-15 8 pocket bag filter, and 2" carbon filter to ensure maximum adsorption of odor and particulate.

Each unit filters approximately 15,000 cubic feet.  
In order to create the proper air pattern, we always recommend placing two units.
